Formal written methods of subtraction

Year 5 & 6

Written subtraction

Choose a written method to calculate the following: Step 1

23056 − 11543 =

31282 − 27417 =

54209 − 23380 =

Choose a written method to calculate the following: Step 2

23892 − 12509 =

37637 − 27346 =

54258 − 22946 =

Choose a written method to calculate the following: Step 3

28868 − 3259 =

3771 − 273 =

62988 − 542 − =

2886.8 − 325.9 =

377.6 − 273.55 =

542 − 329.88 =

Each cell is the total of the two cells below. Fill in the missing values.

6773

3396.7

3087

Written subtraction

Choose a written method to calculate the following: Step 1

11513
3865
30829

Choose a written method to calculate the following: Step 2

11383
10291
31312

Choose a written method to calculate the following: Step 3

25609
3498
62446

22506.9
104.05
212.12

Each cell is the total of the two cells below. Fill in the missing values.

6773

3376.3   3396.7

289.3   3087   309.7
