

# Multiply up to 4 digits by a two-digit whole number using long multiplication

Calculate the following

$$\begin{array}{r} 3254 \\ \times 35 \\ \hline \\ \hline \\ \hline \end{array}$$

$$\begin{array}{r} 6369 \\ \times 54 \\ \hline \\ \hline \\ \hline \end{array}$$

$$\begin{array}{r} 7293 \\ \times 44 \\ \hline \\ \hline \\ \hline \end{array}$$

$$\begin{array}{r} 6825 \\ \times 37 \\ \hline \\ \hline \\ \hline \end{array}$$

In each row, circle the calculation with the smallest answer

$2179 \times 93 = \quad 3268 \times 65 = \quad 9310 \times 39 =$

$4599 \times 68 = \quad 1269 \times 92 = \quad 3452 \times 51 =$

$3786 \times 53 = \quad 5417 \times 45 = \quad 2978 \times 64 =$
