# INSTRUCTIONS

For 2+ players.

Each player must place 5 eggs on their grid and keep it secret from the other players.
The aim is to find your opponents eggs.
For more than 2 players, each person should choose just one opponent.

Give the coordinates of your guess, for example (5,6).
If there is an egg in that space on your opponents grid, they shout "hit" if there isn't they say "miss".
Each player takes it in turns to guess.
You can record your guesses on your page so you don't repeat the same coordinates!
The game is over when a player finds all 5 of their opponent's eggs!

CLUES

As an option you could offer clues. You could limit how many clues you will give. For example you could offer 3 clues in total. 1 would be the x coordinate, another a y coordinate and another using translation. You can get creative with this.
